EDUCATION

Western Washington University

Master of Science in Computer Science

June 2024

GPA:3.85/4.0

Western Washington University

Bachelor of Science in Computer Science | Minor in Mathematics

June 2023

GPA:3.94/4.0

EXPERIENCE

Graduate Research Assistant

NEAT Research Lab

September 2023 – June 2024

Western Washington University

- Collaborated within a team of four students, and one faculty member to conduct a systematic literature review of 1299 peer reviewed articles aimed at exploring ways modern technology can be utilized to analyze the emotions of people with autism.
- Wrote an 11-page paper, submitted and accepted to COMPSAC 2024, also gave several on-campus presentations.
- Designed guidelines for development of a possible future emotion analyzing technology.

Graduate Teaching Assistant

Computer Science Department

September 2023 – June 2024

Western Washington University

- Established inclusive learning friendly environments in weekly lab hours, increasing engagement.
- Offered tailored guidance and direction to students with debugging, critical thinking, problem solving in Java, understanding and applying algorithms.
- Developed and applied a variety of evaluation techniques to provide students assignments, projects, and exams with constructive feedback in a timely manner.

PROJECTS

State Patroller | *Golang, Python, HTML/CSS*

August 2024 – Present

- Developed a application for quick searching for vin inspection appointments which become available at random. Implemented backend using Python.
- Currently utilizing Go for local area network hosting of webpage and email notification feature.

Deep Neural Network | *Numpy, Python*

January 2022 – February 2024

- Developed an arbitrarily deep neural network from scratch.
- Implemented features include classification mode, regression mode, and mini-batching.
- Training network on example data yielded 95% accuracy, demonstrating the models ability to learn.

Reel Time | *React, React Native, MongoDB, Expo Go, Git*

October 2023 – December 2023

- Developed a IOS application for transitioning fishing catch reporting from pen and paper to digital.
- Integrated MongoDB Atlas for online and offline database syncing and storage.
- Collaborated within team of 4 to design and develop application front-end.

Wireless Phone Radio | *Swift, SwiftUI, XCode, Kotlin, Android Studio*

September 2022 – June 2023

- Developed an IOS application for seamless voice communication without the need for a cellular or internet connection with the use of peer to peer WiFi.
- Implemented application front-end using SwiftUI library.
- Collaborated within a team of 4 to create an Android equivalent application.

PUBLICATIONS

- **D. Bogush**, C. Costello, E. Fong, M. Sharmin and S. Ahmed, "Emotion Recognition Technology for People with Autism: A Systematic Literature Review," 2024 IEEE 48th Annual Computers, Software, and Applications Conference (COMPSAC), Osaka, Japan, 2024, pp. 851-861, doi: 10.1109/COMPSAC61105.2024.00118.

TECHNICAL SKILLS

Languages: C/C++, Java, Python, SQL, JavaScript, HTML/CSS, Golang, Julia, Swift

Libraries/Frameworks:: React.js, NumPy, SwiftUI, Matplotlib, MongoDB

Developer Tools: Git, VS Code, Visual Studio, IntelliJ, Eclipse, XCode, Android Studio

Operating Systems: Linux, Windows, MacOS
